## SHADE VARIATION

V1

### UNIFORM APPEARANCE

Differences among pieces from the same production run are minimal.

V2

### SLIGHT VARIATION

Clearly distinguishable differences in texture and/or pattern with similar colors.

V3\*

### MODERATE VARIATION

While the colors present on a single piece of tile will be indicative of the colors to be expected on the other tiles, the amount of colors on each piece will vary significantly

V4

### SUBSTANTIAL VARIATION

Random color differences from tile to tile, so that one tile may have totally different colors from that on other tiles. Thus, the final installation will be unique.
